Perform recoveries quickly and safely with this portable davit and rescue pole system

Proven 3-minute underway man overboard recovery. The portable lightweight man overboard lifting davit attaches to a bitt on a tugboat or is flush mounted on a flat surface on a workboat or ferry. The Rescue Davit system has straps and brackets on back of the unit to allow customization for any bitt. The davit is light enough for one person to retrieve and carry into position. It attaches in less than 30 seconds. One small person on deck can hoist a 158.8 kg (350 pound) person aboard using the included Radial winch. The boom is long enough to clear tires and fenders; the worm gear controls the boom swing.

The flush-mount davit system (Part No. IN162) is designed for flat surfaces. The davit fits into a flush mount and is pinned with two tethered pins. The straps and clamps, feet on the back, and side stabilizers all come off so it will fit into the mount. The flush mount davit system comes with a reduced boom size. A mount for each side of the vessel is recommended.

Complete either system with the VR 12 Rescue Pole, sold separately.

Attaches quickly
The bitt-mount system has adjustable straps with latch clamps for tightening. Straps and brackets on back of the unit allow customization for any bitt. The flush-mount system attaches with removable pins.

Adjustable feet and stabilizers
15.2 cm x 7.6 cm x 61 cm (6’ x 3’ x 24”) aluminum tubing hold adjustable feet and stabilizers (not required for flush mount version).

Includes winch
Bitt-mount davit system comes with a Harken Industrial 20STA Radial winch, with optional upgrade to 35.2STA Radial 2-speed winch. The 35.2STA comes standard on flush-mount davit system. Both systems include rope brake and handle.
**ADDITIONAL FEATURES**

- Rescue can be performed by one person
- Weight: Shown below by product
- Constructed of anodized marine grade aluminum and stainless steel to stand up to harsh marine environments
- 13.7 m (45’) long, 10 mm lift line with stopper ball and hook, 6 mm tension line

---

**Long line to reach MOB**

Boom is long enough to clear tires and fenders. Line is 13.7 m (45’) long; 10 mm lift line with stopper ball and hook, 6 mm tension line.

**Simple to operate**

Worm gear and handle control boom swing.

---

**VR-12 Rescue Pole**

**Sturdy construction**

Strap has a one-way slide-buckle that will not back out.

**Simple operation**

“V” cleat holds the lift line and keeps line out of the way.

- The pole is foam-filled fiberglass tubing with a strong 60 x 60 x 1.9 cm (2’ x 2’ x ¾”) aluminum hoop that allows a single crew member to rescue a fully dressed person weighing up to 159 kg (350 lb). Can be easily and quickly re-rigged for additional rescues. The pole allows MOB to be pulled close to the boat before deploying the strap. Up to 3.6 m (12’) reach.

- Rescue strap automatically detaches from holding blocks and snaps when being secured to the person by cinching the slide-buckle.

---

**Foam wrap**

Pole’s outer hoop is wrapped in foam for victim comfort and increased pole buoyancy. The hoop is wrapped in a red UV protectant reflective cover with SOLAS tape.
